## Synopsis Developed By

Name/Registration No and Roll No.

1.     Name: Pratik Patra  
       Registration No. D151651363  
       Roll No. 25
2.     Name: Sanjeev Sharma  
       Registration No. D151651367  
       Roll No. 29
3.     Name: Subhasis Ghosh  
       Registration No. D151651369  
       Roll No. 31
4.     Name: Kajal Kumar Halder  
       Registration No. D151651361  
       Roll No. 23
5.     Name: Jeet Dhara  
       Registration No. D151651341  
       Roll No. 04

Course Code: CST

College Name: Swami Vivekananda Institute of Science & Technology

Council Name: West Bengal State Council of Technical Education

## ACKNOWLEDGEMENT

We take this opportunity to express our deep sense of gratitude and whole hearted thanks to our project guide Ms. Nilanjana Bose for her guidance. It is all because of her that our synopsis report could become a success. We are greatly indebted to her for guiding and helping us whenever we had any difficulties in our work.

We would also like to thank our friends and family members who have helped and supported us directly or indirectly for preparing this synopsis report.

Finally we wish to thank all faculty members of SVIST who were too co-operative and helpful.

---

## 1. Introduction:

Hostel management system will keep details of each and every student by issuing their unique id which will be provided during the admission time. It will provide the expenditure details of mess department and able to keep track on the stock details of materials used under the mess departments. Admin can access information of each and every employee working under particular hostel number by using their unique number. The list of all working employees working under particular hostel will be displayed separately. Admin can add, delete, modify, and change information and other fields used in hostel management system. Admin can make changes in the mess charges, hostel charges, and other expenditures charges used within hostel campus.

## 2. Objectives of the Project:

The main objectives of this project work are that:

- Student will no longer apply for their hostels manually.
- The warden can see and access the student's data.
- This also will reduce the manual work of the persons in admin panel.
- It helps the admin to know the number of students that can leave in a room and a block.
- To ensure that the number of student staying in a room does not exceed specified limit.
- To know the number of items (e.g. bed, extra services) given to student staying in the hostel

## 3. Project Category:

Desktop Application.

## 4. Tools/Platform:

- Tools: Microsoft Visual Studio. Office Access 2007
- Platform: Windows.

## 5. Hardware & Software Requirements:

- 2.00Ghz or faster processor
- Windows 7 or higher.

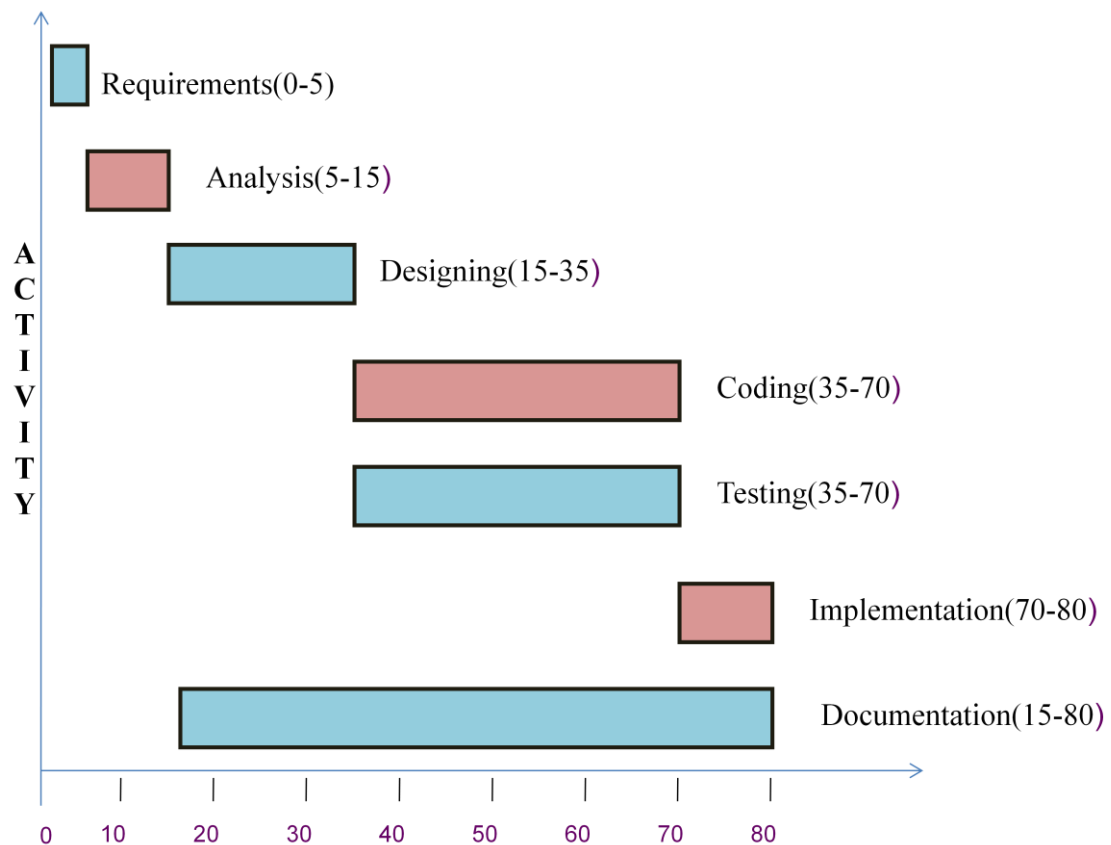

## 6. Problem Definition:

Hostel management system will be able to keep student records, attendance information for each student along with their room number and hostel number details. This system will also calculate the bills for each student for fooding provided by the mess department of every hostel.

## 7. Project Planning (Scheduling):

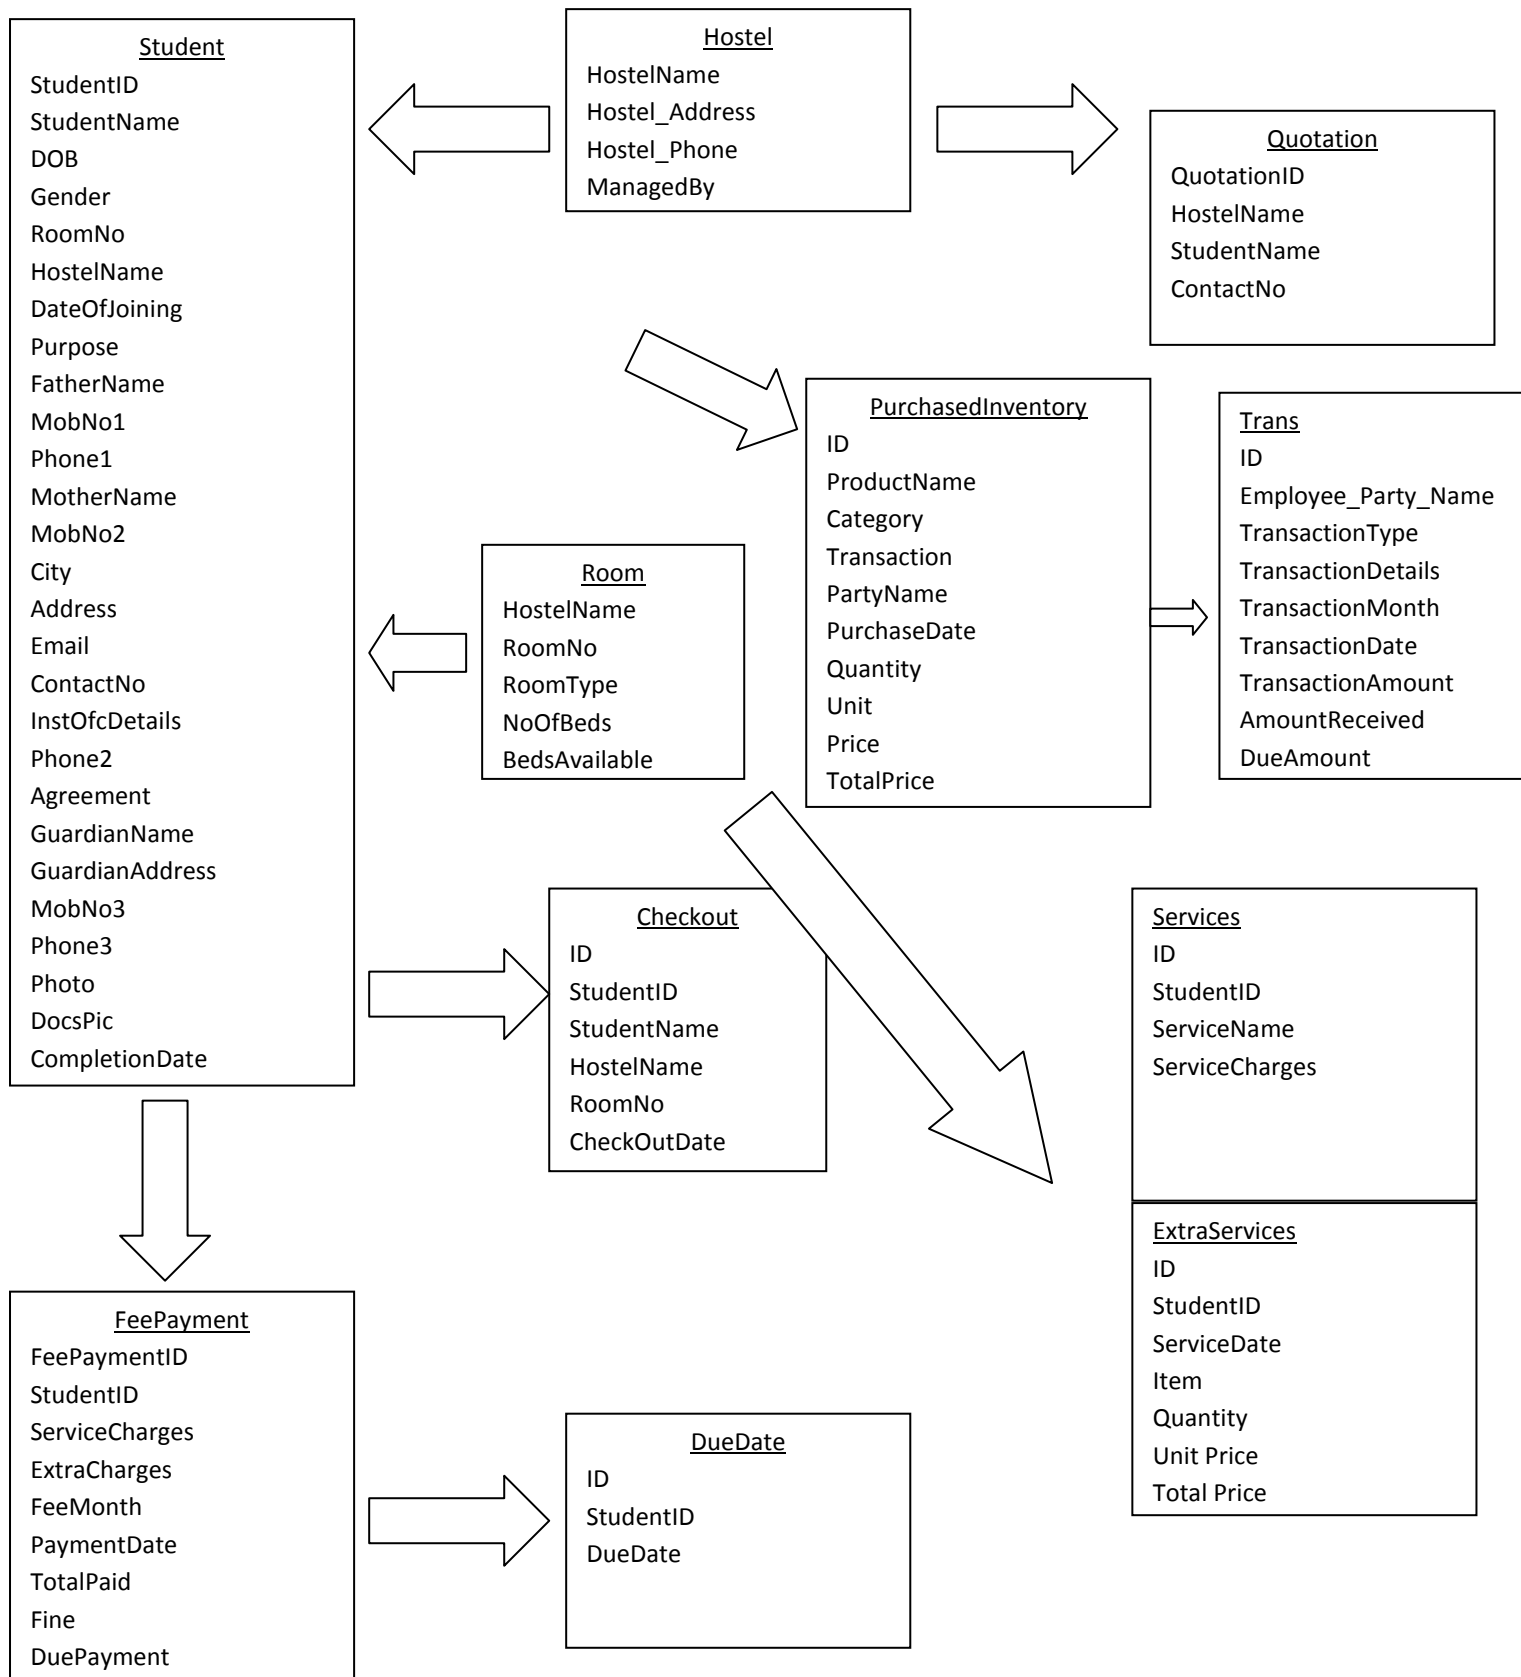

Gantt chart:

### Gantt chart

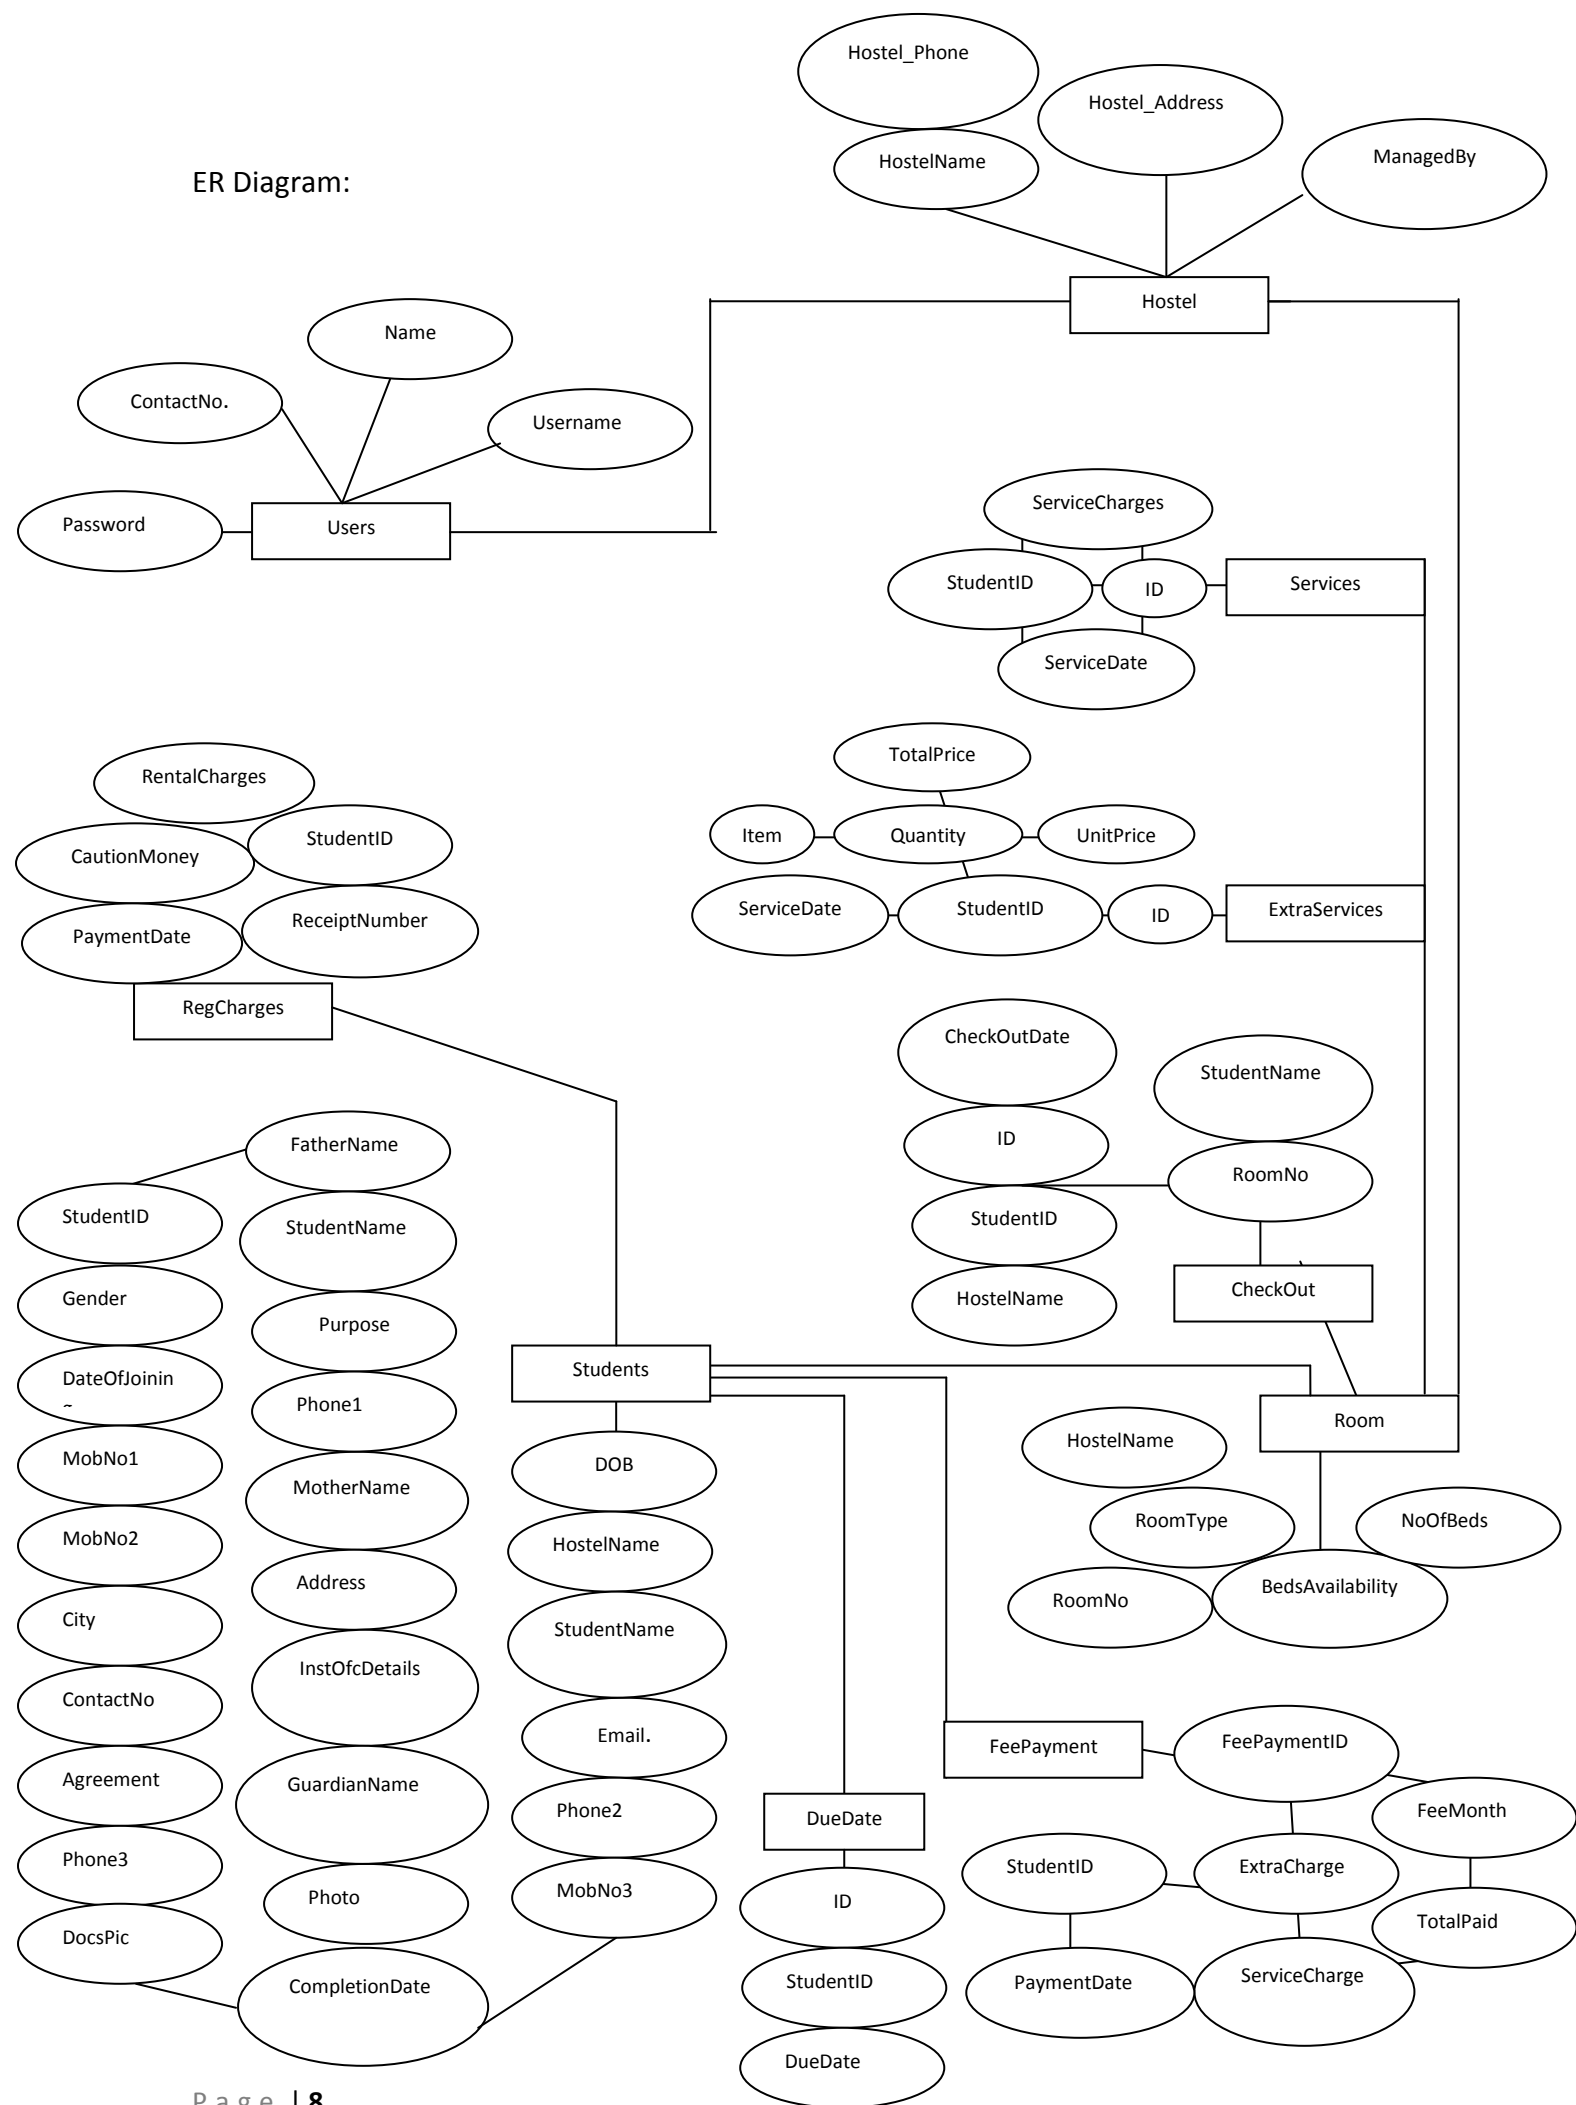

## 8. Analysis

### DFD. (Level 0)

## ER Diagram:

## 9. Modules and their description:

### Hostel:

Stores a list of Hostels, address, phone number, etc.

### Students:

Stores the list of students, and their database such as Date of Joining, purpose, father's name, contact no, etc.

### Checkout:

This module saves the date when a student leaves the hostel.

### Checkout History:

This module saves the history of older students who have left the hostel.

### DueDate:

Saves the fees due date of students with ID.

### ExtraServices:

Saves the extra services availed by students (such as extra foods) during their stay.

### FeePayment:

Saves the payments that are paid by students.

### Purchased Inventory:

This field stores the inventory purchases by the every hostels.

### Quotation:

Stores the proposed quotation(ie; how many months they want to stay there, and fees) by a student.

### Reg Charges:

This field stores the Student's Registration charges with Receipt number, ID, Security deposit, rental charges along with payment date.

### Registration:

Stores the user's UserID and Password.

### Room:

This field stores the rooms availability of every hostels, along with Room No, type, beds and beds availability.

### Services:

Stores the services availed by students, along with total service charges.

### Trans:

This module saves the transactions done by users, both credit and debit for Hostel maintenance, item purchases such as buying groceries or electricity payments.

## 10. Data structure as per the project requirements for all the modules:

### 1. HOSTEL\_DB

Sl. No.	Entity Names Attributes	Data Type	Key/Non Key
1.	<u>Hostel</u> HostelName Hostel_Address Hostel_Phone Managed_By	Varchar Varchar Int Varchar	Primary Key
2.	<u>Students</u> StudentID StudentName DOB Gender RoomNo HostelName DateOfJoining Purpose FatherName MobNo Phone	Autoincrement Varchar Boolean Varchar Int Varchar Int Varchar Varchar Int Int	Primary Key
3.	<u>Room</u> HostelName RoomNo RoomType NoOfBeds BedsAvailable	Varchar Int Varchar Int Int	Primary Key
4.	<u>CheckOut</u> ID StudentID StudentName RoomNo CheckOutDate	Autoincrement Varchar Varchar Int Int	Primary Key
5.	<u>Checkout History</u> ID StudentID StudentName RoomNo CheckOutDate	Varchar Autoincrement Varchar Int Int	Primary Key

6.	<u>DueDate</u> ID StudentID DueDate	Autoincrement Autoincrement Int	Primary Key
7.	<u>ExtraServices</u> ID StudentID ServiceDate Item Quantity UnitPrice TotalPrice	Autoincrement Autoincrement Boolean Varchar Int Int Int	Primary Key
8.	<u>FeePayment</u> FeePaymentID StudentID ServiceCharges ExtraCharges FeeMonth PaymentDate TotalPaid Fine DuePayment	Autoincrement Autoincrement Int Int Varchar Boolean Int Int Int	Primary Key
9.	<u>PurchasedInventory</u> ID ProductName Category TransactionType PartyName PurchaseDate Quantity Unit Price TotalPrice	Int Varchar Varchar Varchar Varchar Int Int Int Int Int	Primary Key
10.	<u>Quotation</u> QuotationID Hostelname StudentName ContactNo ChargesPerMonth1 NoOfMonth1 TotalCharges1 ChargesPerMonth2 NoOfMonth2 TotalCharges2 GrandTotal	Autoincrement Varchar Varchar Int Int Int Int Int Int Int Int	Primary Key

	QuotationDate	Int	
11.	<u>RegCharges</u> ReceiptNumber StudentID CautionMoney RentalCharges PaymentDate	Autoincrement Autoincrement Int Int Int	Primary Key
12.	<u>Registration</u> Username Password Name ContactNo	Varchar Varchar Varchar Int	Primary Key
13.	<u>Services</u> ID StudentID ServiceName ServiceCharges	Int Varchar Varchar Int	Primary Key

15.	<u>Users</u> Username Password	Varchar Varchar	
16.	<u>Voucher</u> VoucherNo ReceiverName TransactionType ACNo Amount PaymentDate	Autoincrement Varchar Varchar Int Int Int	Primary Key

## 11. Implementation of security mechanism at various levels:

The application requires an username and password to login and has facility to register other users too. It's beneficial if an hostel has different staffs working at multiple shifts. All of them require an user id and password which can be registered within this application.

## 12. Future scope and further enhancement of the project.

This project can be implemented with Crystal reports to generate various reports such as complete list of payment, students, etc history that are saved within this application to an printable excel file.
